Client Profile Advantage Air

Triumph Business Systems

Australia's leading air conditioning manufacturer Advantage Air's growth to 200 employees with branches throughout Australia and South Africa over the last 10 years has been supported by Triumph.

Advantage Air is the country's leading manufacturer of air conditioning control systems and componentry. It is an Australian organisation, based in Western Australia, that has been operating for 18 years experiencing exponential growth and expansion.

Through immeasurable investment in R&D, the company has been awarded patents, design mark awards and Federal Government Development Grants for their innovative products. Currently the company continues to innovate and lead product development and supply in the domestic air conditioning industry across multiple markets.

The 38 user Triumph system in Australia runs under Windows Terminal Services supporting branches in Perth, Sydney, Melbourne and Brisbane. Advantage Air have recently set up a 12 user Triumph system for their South Africa operation servicing branches in Johannesburg, Durban and Capetown.

As well as running modules for Multi Division to consolidate their branches, they also run Bill of Materials, Inventory and Job Costing for the manufacturing and costing processes. To aid in the efficient processing of Sales Orders the B2B eCommerce module is used to allow agents to place orders and look at Inventory and order statuses over the Internet.
