

## Changing the OWDV for an Asset after EOY rollover

Overview : There are potentially two things that need amending to adjust the Opening Written Down Value – either the Cost or the Depreciation. The below deals with amending the brought forward depreciation. At the end is a short note on how to change the opening cost.

1. Backup the current database
2. Print the Asset Valuation Schedule after rollover. Eg Asset 442 had Opening Depreciation of \$340.32

DEMONSTRATION COMPANY  
Asset Valuation Schedule (Accounting)  
For Year To Date To 31-Jul-2008

4/09/2009 - 2:32:23PM Page 1 of 1

U - Units of Production

\*\*\* END OF REPORT \*\*\*

3. Go to F-T-P to enter a depreciation adjustment dated 30 June 2008 (or Period 12). The New Acc/Tax Dep should be the difference to make up to the correct opening depreciation required eg:  $\$400 - \$340.32 = \$59.68$

Component Depreciation Details

Asset: 442  
Description: Pentium Computer

Compon...	Description	Dflt. Acc. Dep.	Dflt. Tax. Dep.	New Acc. Dep.	New Tax. Dep.
464	Pentium Computer	\$0.00	\$0.00	\$59.68	59.68

\$0.00      \$0.00

OK

- Print the GL Entry Reference Report (G-R-E) to show the journals effected from the depreciation adjustment made. We're assuming that the brought forward general ledger depreciation balance is already correct, so we'll need to reverse the journal just raised in step 3. Reverse the journal(s) out through G-T-J.

**DEMONSTRATION COMPANY**

<b>GL Period June 2008 (12)</b>							<b>59.68</b>	<b>59.68</b>

2 Records Read

- Go to DB Explorer, look up FA transaction details table (285) and change the Prd\_Date to 30/06/2008 – this will make the fixed asset ledger put the depreciation in our b/f depreciation column.

Database explorer - [triumph version 4.1]

Field: 10 name: Prd\_Date type: DAT length: 6 Filelist: C:\triumph\dem\filelist.cfg

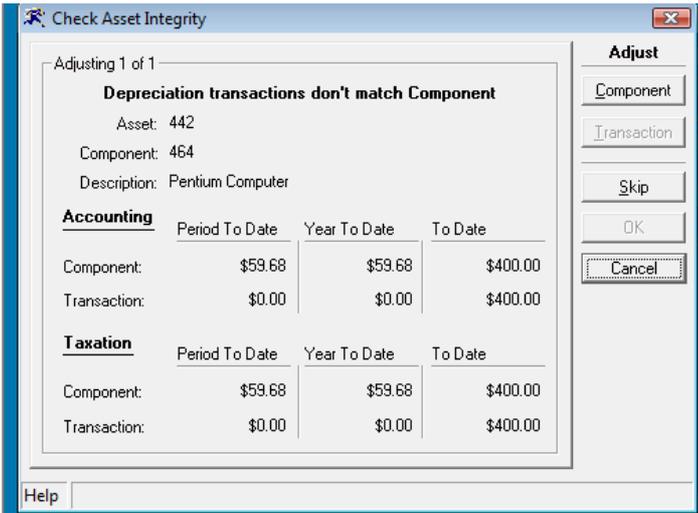

6. The transactions per the system now don't agree to the OWDV balance, so go Check Integrity of Assets (F-S-I)

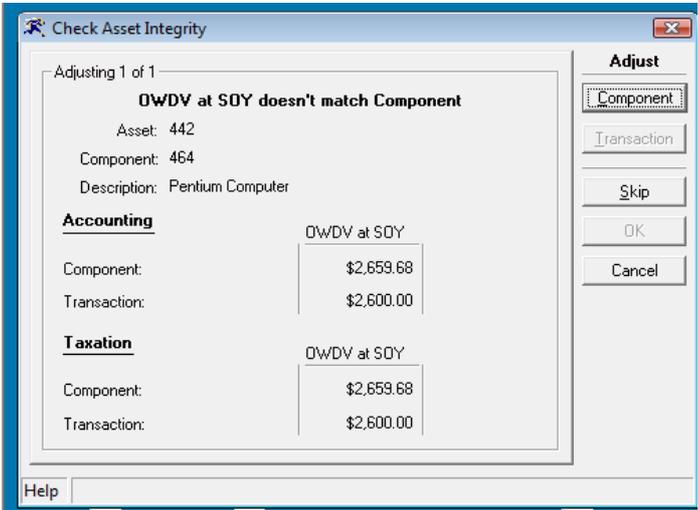

Click Ok

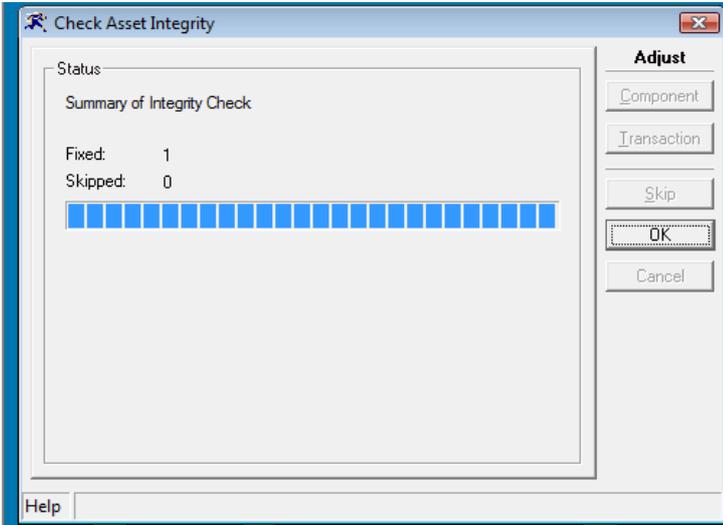

There should be a message saying that the component does not match the OWDV.  
Click OK

Simply Adjust component

And again adjust Component

Click OK

7. Now print the Asset Valuation Schedule (F-R-S). The new Opening Depreciation of \$400 now displays on the report and thus your new Opening Written Down Value is correct.

**DEMONSTRATION COMPANY**

\*\*\* END OF REPORT \*\*\*

To change the opening cost figures you can simply go in to fatall, find the addition transaction for the asset (which you can get by doing an F-R-A), then change the amount on that line.

As above, you'll also have to run an asset integrity check where you adjust the components. This method does not raise any journals
